PTA, Prop Trading Academy Sagl, with registered office in via Giulio Pocobelli 21 6815 Melide CH Registered with number IDI CHE-452.497.325 (hereinafter referred to as "Customer")
Email: info@proptradingacademy.com
Website: www.proptradingacademy.com

Preamble

The Customer holds a securities account with a broker ("Broker"). The Customer would like to use this securities account to execute financial instruments transactions. The Signal Provider trades a demo account within a financial markets challenge based on his trading system and delivers buy and sell signals (hereinafter trading signals) concerning financial instruments transactions. The Customer would like to be provided with the aforementioned trading signals for his securities account and use them if necessary. For this purpose, the following contractual conditions shall apply between the parties.

1.The Signal Provider
The Signal Provider is a participant/user of the financial markets challenges offered by PTA and trades on a demo account in compliance with a specified framework and conditions using his own trading system and provides trading signals in the process.

2. The Customer
The Customer wishes to execute financial instruments transactions with his capital and in this context obtain trading signals from the Signal Provider.

3. Subject matter of the contract, conclusion of the contract
3.1. The subject of the Agreement is solely the provision of trading signals for financial instruments transactions based on the demo account. The trading signals are buy and sell

signals for financial instruments transactions provided by the Signal Provider. The Signal Provider generates these trading signals himself using his trading system on the demo account or the trades executed by him on the demo account.
3.2. The investments that are the subject to the trading signals are not ordinary investments, they are speculative investments, financial instruments transactions.
3.3. The Customer maintains several securities accounts with different Brokers who each provide the ability to make speculative investments in different financial instruments. The names of the Brokers can be provided to the Signal Provider upon request.
3.4. Within the scope of this contract, only trading signals shall be delivered. Their implementation or non-implementation, in whole or in part, is at the sole discretion of the Customer. No asset management, acceptance or transmission of orders or investment advice is provided. The Customer has the sole decision and the sole discretion whether and to what extent he implements the trading signals provided by the Signal Provider on his securities account. The signals and trades of the Signal Provider are neither tailored to the Customer nor are they presented as suitable for the Customer.
The Signal Provider operates exclusively on a demo trading account and does not have access to or control over any real client funds.
The trading signals provided under this Agreement are generated from trading activity performed on a demo account and are provided solely for informational purposes within the context of the proprietary trading challenge. They do not constitute investment advice, investment recommendations, or portfolio management service.
3.5. The Customer waives the separate receipt of the declaration of acceptance of his/her application for the conclusion of this Contract by the Signal Provider. The declaration of acceptance of the application for the conclusion of this Contract shall be made by signing the Contract by the Signal Provider. The Customer will receive the Contract signed by both parties as a scanned document by e-mail or as a digitally signed document by e-mail. The Signal Provider may wait until revocation period has expired before commencing his services.

4. Concrete activity within the framework of providing trading signals for financial instruments transactions

4.1. The Customer wishes to receive trading signals for financial instruments transactions from the Signal Provider and hereby subscribes to such trading signals. The trading signals shall be delivered by the Signal Provider on the basis of the previously determined parameters and the entered market conditions on a demo account traded by the Signal Provider. The agreed operational parameters and trading rules applicable to the Signal Provider are described in Annex 1 of this Agreement.
4.2. An evaluation or opinion of the Signal Provider on its trading signals/trades is neither the subject matter of the Contract nor otherwise owed. The Signal Provider also does not owe any other explanations regarding the trading signals. The Signal Provider will in no case exercise any discretionary power or perceive portfolio management or investment advice and, without a separate contract, shall also not accept or transmit orders for the Customer or execute them.

5. Deposits of speculative capital /no access to client assets

Deposits by the Customer shall be made directly to the respective account-holding Broker. The Signal Provider is not authorized to accept deposits from the Customer or on behalf of the Customer. This does not affect the payment and acceptance of the remuneration owed by the Customer under this Contract for the provision of the trading signals which are the sole subject matter of this contract.

6. Remuneration of the Signal Provider for the provision of the trading signals

6.1. For the provision of the trading signals, the Signal Provider may receive remuneration as determined by PTA in accordance with the applicable program conditions and internal policies, as communicated from time to time.

PTA reserves the right to evaluate performance, risk management and compliance with trading rules before any remuneration is granted.

6.2. The Signal Provider hereby agrees that the first payment will be processed by the Customer only after the Signal Provider has provided to the Customer a full set of identification documents including as a minimum a color copy of his valid Passport and of a recent utility bill not older than 3 months that shows his current residential address.
6.3. Remuneration is excluded if the Signal Provider violates paragraph 10 of this contract.

7. Contract duration and termination.
7.1. The Contract is not subject to a minimum contract period and is concluded for an indefinite period. The contract can be terminated in writing by either party at any time with a notice period of two weeks.
7.2. Each party shall also be entitled to terminate the contractual relationship without observing a notice period by written declaration, if there is an important cause. An important cause shall be deemed to exist in particular if insolvency proceedings are instituted against the assets of a contracting party. Furthermore, a material or sustained breach of the above-mentioned obligations by a contracting party or a breach of any of the agreed parameter for the demo account shall be deemed to be an important cause.
7.3. Upon termination, the Signal Provider’s access to the demo account will be removed and the delivery of the trading signals covered by this Contract shall also end. Claims to remuneration already accrued shall remain unaffected by the termination.

8. Warranty, liability
8.1. The Signal Provider does not guarantee that the trading system or the trading signals on its demo account will be available without error at any time. If technical errors, make the delivery of the trading signals impossible, the parties shall make every effort to remedy the error as quickly as possible.
8.2. Any use of part or more of the delivered trading signals shall be at the Customer’s own risk and responsibility. The Signal Provider does not warrant that the trading signals provided by the Signal Provider’s trading system/demo trades are usable for the Customer’s purposes.
8.3. The Signal Provider is not aware of any rights of third parties that could prevent the delivery and use of the trading signals in question.
8.4. Any results achieved in the past due to the use of the trading signals in question do not constitute a guarantee of results in the future.
8.5. The liability of the Signal Provider for a certain business success of the speculation is excluded. The liability for a trading success of the generated trading signals is also excluded. The Signal Provider can neither guarantee nor otherwise assure a trading success from the signals provided. In particular, no promises of a certain success are associated with the

trading signals, they are success from the signals provided, they are always only trading signals according to the specified parameters, but do not ensure any market success.
8.6. In all other respects, the Signal Provider shall only be liable for gross negligence and intent, regardless of the legal grounds. In the event of slight negligence, liability shall only be assumed in the event of a breach of material contractual obligations.
8.7. Within the scope of the provision of the trading signals, the Signal Provider – except in the case of intent or gross negligence – shall expressly not be liable for the functionality of the necessary data transmission lines or for the reliability of the production process of the trading signals and a correct market assessment. Thus, liability for any delay in the transmission of the trading signals, which occurs due to technical problems, power failure, failure of the data stock, Internet failure, lightning strike, or other force majeure, is also excluded.

9. Material risks of financial instruments transactions
9.1. Financial instruments transactions (such as forex, indexes, commodities, cryptocurrencies, futures, stocks and options) are highly speculative and are suitable only for well-informed, experienced and speculative investors who understand that higher opportunities are associated with higher risks.
9.1.1. Forex ("FX") is the foreign exchange or currency market where different currencies are traded. The risk in the FX market is that it is highly speculative. Even with the inclusion of all available sources, it is difficult to make a reliable forecast of price movements. The market is too volatile and many of the almost innumerable influencing factors cannot be predicted. Although the liquidity of the market is immense and the potential returns are high, in practice the profits are subject to strong fluctuations. Some Forex brokers have a so-called margin call in their terms and conditions. This means for the Customer that in case of a wrong decision he is still liable for the losses of the leveraged products beyond the bet made. The leverage effect, which on the one hand ensures that you can get started with relatively small initial capital, also carries the risk of backfiring. The high profit option is mirrored by the loss option one the other side.
9.2. Futures are forward transactions in which a seller contractually undertakes to deliver a commodity or asset to the buyer at a date and price agreed in advance. In return, the buyer undertakes to take delivery of the agreed goods from the seller. Even with the appropriate level of knowledge, investing in futures products is always a highly speculative investment, as you can open large trading positions in the market with small capital investment. The considerable risks of this investment cannot be completely avoided.
9.2.1 Futures are a leveraged product, which involves a high risk for capital. The maximum amount of loss can therefore not be determined in advance. This may far exceed the investor's original capital investment. Unless otherwise agreed (e.g., the establishment of a risk limit), the Customer is obliged to compensate the loss that exceeds his credit balance held in the futures account. The Customer's risk of loss is thus not limited to his original capital investment, but may encompass his entire other assets.
9.2.2. If losses result in the capital provided on the futures account no longer being sufficient to back open futures positions, the Customer must provide additional funds to restore security (margin call). If the Customer fails to provide the required additional security in a timely manner, the bank may close out the Customer's open futures positions (forced close-out). If losses remain on the Customer's trading account despite such a forced close-out, the Customer shall be fully liable for these losses and shall be obliged to settle the resulting debit balance of the futures account. The risk of loss is therefore not limited to the margin used by the Customer, but also includes his other assets.

9.3. Stock trading means buying and selling shares in companies to try to make money on price changes. Traders watch the short-term price changes of these stocks closely. They try to buy at a low price and sell at a high price. This short-term approach sets stock traders apart from traditional stock market investors, who hold positions in stocks for long term.
9.3.1. Trading stocks can bring quick gains for those who time the market correctly. But it also carries the danger of big losses. A single company's fortunes can rise more quickly than the market, but they can just as easily fall.
9.4. The act of speculating on crypto currency price movements as well as indexes or commodities or other, via a contract for difference (CFD) trading account, or buying and selling the underlying coins via an exchange is known as cryptocurrency or crypto trading. CFD trading is a type of derivative that allows you to bet on cryptocurrency price changes without possessing the underlying currencies.
For example, you can go long (buy) if you believe the value of a cryptocurrency will rise, or short (sell) if you believe the value will fall. Both are leveraged instruments, which means that you only need a little deposit, known as margin trading crypto, to have total exposure to the underlying market.
However, because the profit or loss is still determined based on the total size of the investment, leveraging trading crypto magnifies both earnings and losses.
9.5. Options are tradable contracts that investors use to speculate about whether an asset's price will be higher or lower at a certain date in the future, without any requirement to actually buy the asset in question. Options contracts give investors the right to buy or sell a minimum of 100 shares of stock or other assets. However, there's no obligation to exercise options in the event a trade isn't profitable. Deciding not to exercise options means the only money an investor stands to lose is the premium paid for the contracts. There are essentially three decisions you must make with options trading (direction, price and time), which adds more complexity to the investing process than some people prefer.
9.6. The Customer may open securities accounts with Brokers who allow trading in different instruments other than those listed in this paragraph 9 and may allow the Signal Provider to provide trade signals for those instruments as well. All the terms of this Contract will apply to the provision of trade signals for any financial instruments and not only those stated in this clause 9.
9.7. The delivery of trading signals as described here does not exclude risks and does not reduce the risk of loss.

10. Prohibited trading practices on demo account

10.1. The Signal Provider shall not generate trading signals based on abusive, manipulative or prohibited trading strategies, including but not limited to strategies that may create justified concerns that the Customer could suffer financial, operational or reputational harm as a result of the Signal Provider's activities.

A non-exhaustive list of prohibited trading strategies is published in the Company's FAQ section available at:

https://proptradingacademy.com/faq/

10.2. Immediate suspension and risk control

PTA reserves the right to immediately suspend, restrict or terminate the Signal Provider's access to the demo account and the provision of trading signals in case of suspected abusive trading activity, violation of the trading rules, technical manipulation, latency exploitation, account coordination, hedging between accounts, or any activity that may create operational, financial or reputational risk for PTA.

In such cases, PTA may conduct an internal review and take any appropriate action, including termination of the Contract and exclusion from remuneration.

11. Applicable Law, Prohibition of Assignment, Place of Jurisdiction, Contract Language

11.1. The applicable law is the law of Switzerland.
11.2. For disputes in connection with this contract, the registered office of the Customer is agreed, as far as permissible.
11.4. The contract language is English, so that only the English contract is legally binding. Any translations into another language shall only serve the purpose of better understanding. The main language for communication is English or Italian also, although Customer and Signal Provider may communicate in any other language both can speak and write fluently.

12. Final provisions
12.1. Simple communications between the parties shall be sent to the last e-mail and or mailing address given in writing in each case and shall be deemed to have been delivered to the recipient immediately if sent by e-mail or within the ordinary postal period if sent by post. A period of no more than five working days is agreed as the ordinary postal delivery time.
12.2. No side agreements have been made. Amendments to the Contract must be made in writing.
12.3. Partial invalidity shall not result in total invalidity. In the event that a provision is invalid, the contracting parties agree that the invalid or incomplete provision shall be replaced by a provision that comes as close as possible to the economic sense and purpose of the invalid or incomplete provision in a legally permissible manner.

13. Data protection clause, consent contacting
13.1. The parties agree that the data of the respective other party disclosed in the course of the business relationship shall be electronically recorded and used in the course of the business relationship. The data shall be summarized and electronically processed as far as necessary. The data will not be passed on to third parties. Personal data shall be deleted if knowledge thereof is no longer required for the storing department to fulfil the tasks for which it is responsible.

13.2. Reference is made to the statutory provisions regarding retention periods and obligations.

14. Independent contractor

The Signal Provider acts as an independent contractor and not as an employee, agent, partner or representative of PTA.

Nothing in this Agreement shall be construed as creating any employment relationship, partnership, joint venture or fiduciary relationship between the parties.

15. Participation in proprietary trading programs

Participation in PTA proprietary trading programs is conditional and may be modified, restricted or terminated at PTA's discretion in accordance with this Agreement and the applicable trading rules.

Nothing in this Agreement guarantees continued participation in any proprietary trading program.

ANNEX 1 – TRADING PARAMETERS AND OPERATIONAL RULES

This Annex forms an integral part of the Signal Provider Contract between the Signal Provider and PTA, Prop Trading Academy Sagl.

The Signal Provider participates in a proprietary trading challenge organized by PTA and generates trading signals based on trades executed on a demo trading account.

The trading activity of the Signal Provider must comply with the operational parameters and rules defined by PTA for the specific challenge or program in which the Signal Provider is enrolled.

These rules include, but are not limited to:

- maximum total drawdown
- maximum daily drawdown
- profit targets
- account size and scaling rules
- permitted and prohibited trading strategies
- risk management limits
- maximum exposure or position size

The full and updated version of the trading rules applicable to the PTA challenges is published in the Company's FAQ section available at:

https://proptradingacademy.com/faq/

The Signal Provider acknowledges that the FAQ section contains the operational rules governing participation in the PTA trading programs.

PTA reserves the right to update or modify these rules from time to time for operational or risk management reasons. The Signal Provider agrees to comply with the rules in force at the time of trading activity.

Violation of the rules published in the FAQ may result in suspension of the demo account, exclusion from remuneration, or termination of this Contract.
